EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Haas on 7/6/2005.

The application has been amended as follows:

In the preliminary amendment filed on 8/23/2004, on page 2, line 4, before "the entire", --now US patent 6,747,165--has been inserted.

Claim 153 has been canceled.

Allowable Subject Matter

Claims 47-105 are allowed.

The following is an examiner's statement of reasons for allowance: the closest art of record Marinangeli et al (6,111,158) discloses a process of making alkylated aromatic including a step of isomerization of normal paraffins to light-branched paraffins, dehydrogenating the light-branched paraffin to olefins and then alkylating an aromatic with the olefins (col. 8, lines 22-53; col. 10, lines 19-46). However, Marinangeli does not disclose that the first step includes both reactions hydroisomerization and hydrocracking of paraffin wax which is known to have a high number of carbons, such as 26-30 carbons as disclosed in Hackh's Chemical Dictionary published in 1965, page 722. Further, Marinangeli does not disclose One having ordinary skill in

the art who studies the Marinangeli reference must recognize Marinangeli teaches oppositely with the claimed process since Marinangeli does not want a cracked alkylating olefins (col. 9, lines 16). Therefore, the claimed process is not disclosed by Marinangeli, and also not obvious to be modified from the Marinangeli process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
